

How to use this Training Plan

STEP 1

Get your shoes and all your other gear ready. (no cotton socks, correct hydration, etc.) Follow St George Running Store, they always have great gear advice.

Get your friends to join you!
Or join meet up with the Running Group

STEP 2

Find a great 3-mile course - do a "race" on that course. Record all your data: pace, heart rate, and how you felt. More details on a 30-minute time trial [here](#). (Be ready to see improvement over the next 16 weeks!) You may want to do "Lactate testing with PR Performance Lab, which will help you know your exact zones. More on that [here](#).

STEP 3

Print the calendar - post where you can see it daily. Mark off each day you complete. Make notes of how each run feels! If you train with a gps/running watch - program the trainings into the watch. If you would rather have them "magically" show up on your watch, you can do that [here](#). watch - program the trainings into the watch.

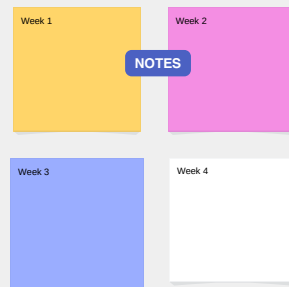

STEP 4

Know this is a guideline - you do not have to follow it exactly. If you like long runs on Sundays - do it. If you like Speed work on Mondays, do it. You can move things around to make it all fit in your life!

STEP 5

Know that PR Performance Lab is here for you! If you want a more personalized plan. If you need help with strength training, with an injury, to increase your performance, dialing your exact zones, your nutrition. All the things!

HOW ARE YOU FEELING

YOU GOT THIS

Congratulations on registering for the St George Marathon!

Your St George Running Center 12-week plan is set to begin July 14th! The plan is written assuming you have reached a base of at least 22-26 miles per week. If you have not, we suggest choosing a training schedule slightly slower.

We wish you the best in your StG Marathon Goals!

4:00 STG Marathon

marathon pace: 9:09

WEEK 16-13
JUNE 16 - JULY 13

SUNDAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	TOTAL WEEK MILES
	5 miles *Easy pace Strength/ Mobility	4 mile @ Easy pace	4 miles @ Steady pace	5 miles @ easy pace Strength/ Mobility		6 miles @ Easy pace	/24
	5 miles Easy pace Strength/ Mobility	4 miles @ Easy Pace	5 miles @ Steady pace	5 miles @ easy pace Strength/ Mobility		7 miles @ Easy pace	/26
	5 miles @ Easy pace Strength/ Mobility	5 miles @ Easy Pace	5 miles @ Steady Pace	5 miles @ easy pace Strength/ Mobility	2 miles @ Easy Pace	6 miles @ Easy pace	/28
	5 miles @ Easy pace Strength/ Mobility	6 miles @ Easy pace	5 miles @ Steady pace	5 miles @ easy pace Strength/ Mobility	2 miles @ Easy Pace	7 miles @ Easy pace	/30

*Zones: Are based off of a % of heart rate.

Zone 1/Warmup = 50-60% MHR = <12:30 m/m

Zone 2/**Easy Pace** = 60-70% MHR = 11:45-10:30 m/m

Zone 3/**Long Run Pace** = 70-80% MHR = 10:30-10:00 m/m

Zone 4/**Steady Pace** = 80-85% MHR = 10:00-9:00 m/m

Zone 5/**Tempe Pace** = 85-90% MHR = 9:00-8:45 m/m

Lactate Testing is the most exact way to find your bodies exact zones.

4:00 STG Marathon
